

At a time when the "brain drain", the emigration of young qualified experts from countries in transition, becomes the main and common problem, Kristina Urošević and Tamara Bogdanović, the best students in their generation at the Faculty of Mining and Geology of the University of Belgrade, made a decision to stay in Serbia.

Kristina and Tamara were in a position to choose and they have chosen our mine! These new members of our team represent both the future of the Rudnik Mine and our focus on the promotion of our genuine values, know-how, expertise and gender equality, as the criteria for future success and the constant improvement of our corporate social responsibility standards.
